

🌟 Adios, Baja Rita's: Celebrating 2.5 Amazing Years in Lewisville 🌟

Dear Beloved Lewisville Community,

With a bittersweet heart and a profound sense of gratitude, we are announcing the closure of Baja Rita's in Old Town Lewisville. It has been an incredible 2.5 years of serving you, and it's with immense appreciation that we reflect on the memories we've created together. 🤝❤️

We opened a restaurant in the middle of the COVID-19 pandemic, with hopes of creating a vibrant atmosphere to bring people together over delicious food, refreshing drinks, and rockin' live music. Little did we know that this journey would be even more remarkable than we could have ever imagined...

We've had the privilege of meeting extraordinary people who have become more than just customers; you have become friends and family. The lively Old Town nights filled with live music and events hosted at our restaurant allowed us to share moments of joy, laughter, and connection with all of you.

This journey wouldn't have been possible without the dedication of our incredible staff and the support of the Lewisville community. Your smiles, your laughter, and your love for Baja Rita's have warmed our hearts and fueled our passion. As we bid farewell, we want to express our deepest thanks to every one of you who sat in our silos, enjoyed our queso, drank our ritas, and shared unforgettable moments with us. You have made these past 2.5 years truly remarkable, and we are forever grateful for your unwavering support.

Goodbyes are never easy, so we're inviting you to share cherished memories with us via email ([Lewisville@BajaRitas.com](mailto:Lewisville@BajaRitas.com)) so we can put them on the website. We'd love to hear about the moments that made your visits special, the laughter shared with friends, and the flavors you'll miss the most.

Thank you, Lewisville, for embracing us, supporting us, and becoming a part of our family. You've made Baja Rita's journey in this beautiful town unforgettable!

With heartfelt gratitude,

The Baja Rita's Team
